

GeoVUE: Visualising Data via the Grid

Dr Andrew Hudson-Smith

Centre for Advanced Spatial Analysis

<http://www.digitalurban.blogspot.com>

Google Earth and Google Maps
have changed the Visualisation Landscape

Geography is Important Again

Visualising Data is still a MSc Problem

Phase One: Create Open Source Tools to Visualise Data

YouTube revolutionised Video Online

Introducing MapTube.org

The Map Tube Concept

Simple Creation of Google Maps/
Google Earth – Reaching out to Sciences

Upload to a External Server
Data Processed via the Grid

Issues of Copyright – Stops the Project in its Tracks (?)

Utilise Anonymous Upload and Server (?)

Phase 2 Based Around Virtual London
3D To M25, City Wide Free 3D Planning
And Data Integration

Research Thoughts at:
